SHORTENED STATUTORY PERIOD OF RESPONSE	NOTIFICATION DATE	DELIVERY MODE
3 MONTHS	01/11/2007	ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Notice of this Office communication was sent electronically on the above-indicated "Notification Date" and has a shortened statutory period for reply of 3 MONTHS from 01/11/2007.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

jcartee@kmob.com
eOAPilot@kmob.com

C

Office Action Summary	Application No. 10/690,833	Applicant(s) DENNEY ET AL.	
	Examiner M. Alexandra Elve	Art Unit 1725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-22 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 22 October 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uraki et al. (USPN 5,977,515) in view of Otsubo et al. (USPN 6,507,000) and Freiwald (USPN 6,693,255).

Uraki et al. discloses an underwater laser-processing chamber 38 (housing). The laser (6) is contained within the chamber, which contains a mirror (40) and a lens (7). Although there are partitions to negate contamination of the laser machining area there are no means of removing the debris.

Otsubo et al. discloses a dust collector for a laser-drilling machine. The containment collector is placed between the lens table (1) of the laser and the workpiece (4). Machining debris is collected in the containment area (B) and then swept out through (7a). It would have been obvious to one of ordinary skill in the art at the time of the invention to use a containment collector as taught by Otsubo et al. in the Uraki et al. system because the debris can be removed from the work or machining zone and hence yielding an optimal product. Otsubo et al. does not teach cooling of the containment collector.

Freiwald et al. discloses a system for laser ablation and cleaning. Material and vapor ablated from the workpiece 15 is removed from the vicinity of the cleaning head 20 by means of a powered vacuum and filtration unit 40. The vacuum unit is equipped with a conventional

Art Unit: 1725

blower to create reverse pressure in the flex vacuum hose 42. Flex vacuum hose is in fluid communication between the vacuum filtration unit and the cleaning head, so that ablated particulates and vapors are sucked from the head to the unit, where filtration of the air stream is accomplished. The cleaning head must permit some ambient air to enter the nozzle, in order to cool the ablated material and dilute and entrain the ablated material for easier filtration. In addition for high-powered lasers water-cooling may be used. (abstract, cols. 5-6)

It would have been obvious to one of ordinary skill in the art at the time of the invention to use air cooling or water cooling as taught by Freiwald et al. in the Otsubo et al. and Uraki et al. system because cooling of the machining debris negates contamination effects on the optics and potential redeposition of debris on the workpiece surface.

Response to Amendment

The amendment filed 6/15/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "cooling conduit fluidly coupled".

Applicant is required to cancel the new matter in the reply to this Office Action.

Response to Arguments

Applicant's arguments filed 10/26/06 have been fully considered but they are not persuasive. Applicant arguments are with respect to the new amendments. In view of the new matter rejections the arguments are moot.

Art Unit: 1725

Applicant stated that there was no new matter. The examiner agrees in part with the applicant. The examiner has withdrawn the new matter rejection based on the "cooling conduit", but not "cooling conduit fluidly coupled". Applicant's specification (0078) states an air cooled or water cooled plenum and coolant conduits, thus "cooling conduit" is stated in the specification. As for "fluidly coupled", this limitation is broader than what is written in the specification. The specification only gives coverage for air or water.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Alexandra Elve whose telephone number is 571-272-1173. The examiner can normally be reached on 6:30-3:00 Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

January 8, 2007.

M. Alexandra Elve
